B. Read the following passage. For each of the questions from 31 to 35, write T if the statement is TRUE, F if the statement is FALSE and NI if there is NO INFORMATION on it.

GIVING BACK TO YOUR COMMUNITY

Although you may have busy lives, helping the community is something that you should always make time for. Giving back not only helps you feel good, but it also brings many benefits to those around you. By participating in those meaningful voluntary activities, you can also make new friends, connect with the community, learn new skills, and even develop your career. There are many ways to give back to the community.

Cleaning up your neighborhood is helpful to both the community and the environment. By picking up trash and doing some yard work, you can make your area a more pleasant place to live. Neighborhood cleanup is proof that even small acts of kindness can make a huge difference.

Another way is to care about your neighbors and the people around you. By taking some time to get to know your neighbors, you can find out more about the challenges they face and develop ways to help them. Whether the solution is planning a budget, doing some grocery shopping, or even having a brief chat, a little effort can make a real change in their lives.

If you have some extra money on hand, then consider donating a small amount to a local charity. Before you do, however, make sure that your charity of choice is a real one. Even by donating your unwanted possessions, you can help someone in need. You may also consider donating unwanted items to charity shops, or contributing unused food to a food bank.

31. Helping the community is beneficial to both the community and the volunteers. **True** ____
32. You can help the neighbors simply by spending time talking to them or helping them buy groceries. **True** ____
33. You can make donations to charity only when you have a lot of money. **False** ____

34. It is not easy to find a real and reliable charity to give donations to.
35. Donating fruits and vegetables is not a good idea.

NI ____
False ____

C. Read the following passage. Mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the questions from 36 to 40.

A community is a group of people who live close to each other. In this day and age, however, online communities are the fastest-growing ones. A **virtual** community is one whose members interact with each other mainly via the Internet. These communities get people with similar interests together so that they can share their interests or help each other in different ways.

Virtual communities can just be for fun, but many of them have a serious purpose. For instance, many women who are soon-to-be moms can now get support and advice from others who have experience or those who are expecting their children. Similarly, many people join a virtual community for educational purposes. *MOOCs*, or massive open online courses, are places where people can join an educational course using the Internet.

In some online communities, members not only communicate with each other online, but they may also meet up in the real world. For example, people interested in cosplay may use online communities to organize cosplay conventions where members can dress up and meet with others. Many of these communities cross international borders. *Book Crossing*, a social networking site for book-lovers, has members in 132 different countries.

Moreover, some online communities care more about improving the real community that they live in. *Street Bank* is a virtual community where real-life neighbors can offer to help each other out by lending things like sports or cooking equipment, or by doing up their houses or gardens.

36. What does the word “**virtual**” in the first paragraph mean?
A. on Facebook **B. online** C. in real life D. offline
37. Who joins the same virtual community?
A. People with the same jobs
B. People who own the same things so they can have fun together.
C. People who share similar interests or care about the same things.
D. People who care about others.
38. Why do people join *MOOCs*?
A. To learn an online course
B. To read comic books.
C. To communicate with teachers online.
D. To borrow barbecue equipment.
39. Which of the following statements is NOT true?
A. People can get support and advice from a virtual community.
B. *Book Crossing* is a local virtual community for those who like reading.
C. There are many reasons why people join a virtual community.
D. Sometimes members of a virtual community meet up in person.
40. Which virtual community may help you repair your house?

You're listening to Hartmouth Radio. In today's news, Hartmouth City government has just announced the winning projects in this year's Youth Lead the Change competition. And this is how Hartmouth's young people voted on ways to spend one million dollars of the city's budget. The winning project is Plant the City. 5,480 people voted to spend the money on planting more trees and plants around the city. This will help fight climate change and make Hartmouth more beautiful. The second project with 5,476 votes is Hartmouth Shelters. The money is going to buy new furniture, facilities, and equipment to give some help to people who are sadly experiencing homelessness. The last project with 4,100 votes is Heat for Success. The money is going to update or replace school heating systems. This will help students study better in winter. If you are interested in joining next year's Youth Lead the Change competition, choose from the list of projects on their website, then write to them saying why you think it's the best way to help improve Hartmouth. Next up, weather with Nick.

B. Read the following passage. For each of the statements below, write T if it is TRUE, F if it is FALSE and NI if there is NO INFORMATION given.

THE HISTORY OF INVENTIONS

There have been many creations and discoveries in the last few centuries that have changed the world. When people think of important inventions, they usually think of the car, the lightbulb, the phone and the internet. However, inventions don't always have to be about technological advances.

One of the first inventions in history was stone tools, used for farming and building more than two million years ago. Before that, people used to use their hands, but it was slow and tiring. Stone tools might sound unimportant, but they helped give the idea for many more inventions to come, such as wooden boats, clothing and paints. Many of these were invented in Africa.

If you think that inventions were just used for work and to make life easier, you might be mistaken. Inventions have often also been about what makes people happy and keeps them entertained. Think of musical instruments, the radio and the cinema. People are always looking for new ways to enjoy their time, or to make difficult times easier. It's not always about turning hard work into easy work.

It's important to understand the inventions of the past to see how much the world has changed, and to appreciate these changes and advances. While it is hard to know what the next big invention will be, it is exciting to try and guess.

C. Read the passage and choose the best answer to each of the following questions.

THE GREATEST INVENTORS

When we think of "the greatest inventors" in the world, we almost always think of those like Thomas Edison or Alexander Graham Bell. They had revolutionary ideas and there is no doubt that our lives would be very different (and very boring) without their creations. It almost seems like nobody has invented anything useful in a long time, but this is simply not true!

Our technology today is so advanced that new inventions don't seem to have life-changing results. But this doesn't mean that they aren't useful, or that they aren't amazing, either. It's just that they are less noticeable than it was in the past when new creations considerably changed our way of life. And so, we should celebrate these incredible people and respect them as much as we respect the inventors that came before them.

Modern-day inventor Elon Musk has transformed the world of automobiles with his creation of arguably the first self-driving car that performs as well as regular cars.

Before he passed away in 1931, Thomas Edison held the world record for the largest number of inventions – 1093 to be exact. In 2003, a Japanese inventor named Shunpei Yamazaki beat his record. As of today, Yamazaki holds the record of 6074 inventions, and counting!

And then there is Mark Zuckerberg whose invention actually did change our lives, especially in terms of social media, marketing, and even job creation. Zuckerberg was only 19 years old when he invented Facebook. In 2007, at age 23, Zuckerberg became the world's youngest self-made billionaire.

36. What is true about paragraph 1?

- A. Everyone knows about Thomas Edison and Alexander Graham Bell.
- B. Thomas Edison and Alexander Graham Bell used to be the greatest inventors.
- C. Past inventions seem to have a greater influence on our life than modern ones.
- D. There haven't been any great inventions for a long time.

37. Why do we not seem to take much notice of new inventions today?

- A. They are bad inventions.
- B. They make little changes to our lives.
- C. There aren't many new inventions.
- D. They aren't useful.

38. What did Elon Musk invent?

- A. The first fully self-driving car
- B. The first social media platform about cars
- C. The first electric car
- D. The first mobile-controlled automobile

39. What is the current world record of inventions?

- A. 1931
- B. 1093
- C. 2003
- D. 6074

40. Which is NOT an effect of Mark Zuckerberg's invention?

- A. People can have more jobs.
- B. People can share things online easily.
- C. People can promote and sell things better.
- D. People lead better lives.

Hello everyone and welcome back to Science Today Radio! Today's topic has been about inventions and becoming an inventor. Now, we're going to listen to some tips and ideas sent in to us by listeners. So, the first piece of advice is that if you want to be an Inventor, then you should never quit! Eighty-six percent of people fail on their first try, but you must keep trying.

Alright, moving on. Tip number two on how to become an inventor – find a teacher or a mentor. While learning and studying from books and YouTube are great, there is nothing more useful than learning from someone who has already done it.

Okay, tip number 3! Tip number three is to improve your ideas. If you have a great idea for an invention, that is fantastic, but always try to find new ways to make that idea even better. The more you try and improve your ideas, the better chance you have of being successful.

This brings us to our final, and most important tip for today: be creative! Inventing something isn't only about good ideas, but it is about new and different ideas. Interesting fact: did you know that 72% of new ideas come when people are showering.

Alright, that's all for today. Catch you next time on Science Today Radio!
